

Investment Approach

Pendulum Asset Management, LLC (“Pendulum”) is a Registered Investment Advisor and investment management firm built to capitalize on what we believe to be underfollowed and underappreciated equity and preferred securities.

Pendulum’s Income Strategy’s objective is to invest in what we believe to be undervalued high-yielding equity and preferred securities with the goal of achieving an alternative income stream for our clientele.

Traditionally, high-yielding securities carry additional risks and are more volatile relative to the market. However, our differentiating factor is that we utilize our internally developed methodology, focusing on business quality, asset quality, as well as management quality to help manage these additional risks.

Using our internal methodology, we aim to provide long-term value, income, and capital appreciation to our clients.
